SAYS AU REVOIR—Miss Shirley Douglas, daughter of Regina, says she is leaving for London to study drama. The daughter of Saskatchewan's premier says she is leaving for London to study drama. The daughter of Saskatchewan's premier says she is leaving for London to study drama. The daughter of Saskatchewan's premier says she is leaving for London to study drama.

TITO'S BRIDE IS STILL MAJOR IN YUGOSLAV ARMY—British Foreign Secretary Anthony Eden, (left), smiles during reception given for him in Belgrade by Marshal Tito, (right), premier of Yugoslavia. In centre is Josipka Brusa, a 25-year-old student to whom the 60-year-old Tito was quietly married a short time ago. She served as a partisan fighter during the war and is still listed as an army major.—Central Press Canadian.

WINGS FOR THE INFANTRY—The new U.S. one-man jet helicopter is shown going through its paces during the first public demonstration of the craft at Torrance, Calif. Called a jet jeep, the craft ranks as the smallest ever made for the U.S. army. Top speed is 50 miles an hour, and it can fly 1,000 feet in altitude and stay about two hours without refueling. Two pulse jets power the craft. It can be dismantled and transported in a regular jeep.—Central Press Canadian.

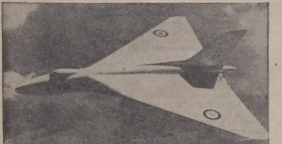

WELCOME IN PARIS—Hon. Lester B. Pearson, Canadian Minister of External Affairs, (left), is greeted on his arrival in Paris recently by Lord Amery, British secretary-general of the North Atlantic Treaty Organization. Mr. Pearson flew to Paris to meet with N.A.T.O. officials and turn over the post of president of the organization's Council to Ole Bjorn Kraft, Danish Foreign Minister.

GOES 2,000 MILES TO ESCAPE REB—Twenty-one-year-old Fritz Bruch is reunited with his wife and daughter in Berlin after being held by the Russians since 1944. Captured by the Reds in Rumania, Bruch was sentenced to 25 years of confinement in Starnitz. Managing to escape, he fled approximately 2,000 miles to safety in the Western zone of Berlin.—Central Press Canadian.

READY TO DEFEND BRITAIN'S SKIES—Here are three phases of a test made near London of the new British jet-engine supersonic missile which may be used as an anti-aircraft weapon. Launched from a twin-engine plane with the aid of rocket boosters, the target is shown, (top), at the start of its flight with rocket motors still attached. In centre, they are dropped. Fused at booster, (bottom), it is propelled by its own jets.—Central Press Canadian.

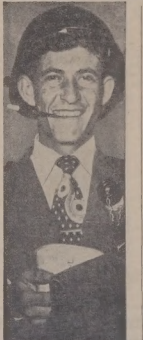

BRITAIN'S BEST IN JET BOMBERS—This photo is one of the few showing the delta-winged British bomber, the Avro 688, in flight. Though absent at the air show at Farnborough, where most of Britain's new planes appeared, the bomber's performance is still secret. British air minister's officials say it will fly faster, higher and farther than any bomber in the world.—Central Press Canadian.

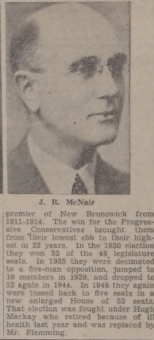

CARRYING FREE ENTERPRISE TOO FAR—A police inspector peers into a giant mash vat while three other officers inspect the huge still uncovered in Philadelphia. Destroyed as the biggest bootlegging operation in the city since the days of prohibition, the plant was capable of producing \$60,000 worth of illegal whiskey every day at full capacity.

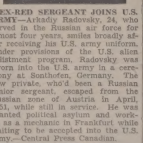

BIRTH OF A VOLCANIC ISLAND—Huge clouds containing sulphur and pumice rise 1,000 feet in the air as a volcanic eruption in mid-ocean, 180 miles south of Tokyo bay, near Nanyangma reef. The eruption is forming a small island. A similar eruption 20 years ago formed an island, which later disappeared.—Central Press Canadian.

WINNER AND LOSER—The Progressive Conservative Party led by Hugh John Fleming, 53, scored one of the biggest upsets in Canadian provincial elections by sweeping New Brunswick with a 36-16 majority in a straight two party fight with the Liberals. Hon. J. B. McNair, premier of the province for the last twelve years, met personal defeat along with four of his cabinet members. Mr. Fleming, a 40-year-old, 260 pound man, is the son of J. K. Fleming the

premier of New Brunswick from 1911-1914. The win for the Progressive Conservatives brought them from their lowest ebb to their highest in 25 years. In the 1930 election they won 32 of the 48 legislative seats. In 1935 they were defeated in a five-man opposition, dropped to 19 members in 1940, and dropped to 12 again in 1944. In 1948 they again were elected back to five seats in a new enlarged House of 52 seats. This election was fought under Hugh Mackay who retired because of ill health last year and was replaced by Mr. Fleming.

EN-ROB SERGEANT JOINS U.S. ARMY—Alfred Radevsky, 24, who served in the Russian air force for almost four years, smiles broadly after receiving his U.S. army uniform. Under provisions of the U.S. atom enlistment program, Radevsky was sworn into the U.S. army in a ceremony at Southfield, Germany. The new private, who has been a Russian senior sergeant, escaped from the Russian zone of Austria in April, 1951, while still in service. He was granted political asylum and worked as a mechanic in Frankfurt while waiting to be accepted into the U.S. army.—Central Press Canadian.

FARMER IKE—Wearing a quail, real representation, General Dwight D. Eisenhower does a hat that was presented to him in Gary, Indiana, when the campaign trail stopped there. Ike spoke to several thousand people who lined the railroad embankment.—Central Press Canadian.

LANDLORD ON TRIAL TESTS REFORM LAWS OF GENERAL NAUUB—An immediate test of Gen. Nappu's land reform laws in Egypt has been made by a wealthy landowner, Adel Lavchin. When his estate of 1,000 acres was to be divided by defunct police, most one and rode away a plane with several followers and shot up the plane, wild west style. Arrested on charges of killing the death penalty. In a recent trial, the estate was sentenced to death and Egyptian law will soon use if Nappu's policy. Case of discrimination in favor of the landowners.—Central Press Canadian.

NEW HEART SURGERY MAKES ATHLETE OF BEDRIDDEN PATIENT—After surgery of Chicago claims to be the first of his kind in all his history, suffering from coronary heart disease, he submitted to a new kind of surgery in which a pump was poured into the new surrounding. The heart, confined to bed before the operation, he was able to do great, around the hospital afterward. And this, as the photo shows, rated a class from the nurses.—Central Press Canadian.

The discovery was made by Professor Stuart Piggott, professor of prehistoric archaeology, and J. Atkinson, lecturer in prehistory. They sent the charcoal to the Chicago Institute of Nuclear Studies. There, Professor W. F. Libby established by radio-active carbon methods, that the wood was burnt some time between 1223 and 1573 B.C.

How We Look To Man

REGINA.—How do Canadians look to a visitor from India, M. N. Kaul, secretary of the Indian Parliament, gave his observation here.

Mr. Kaul said the major objectives of the average Canadian include a \$2,000 car, a \$10,000 house and the opportunity to visit the United States every now and then.

But they realize "there is no escape" from the American influence. Material ties with the United Kingdom—trade, mutual defence and the like—were loosening.

Nest, the side board forms no place. There can be ordinary shoring boards, 1 inch by 4 inches, and to stakes driven into the ground to support the boards. If the ground is flattened, the stakes must be adjusted to grade and slopes by a hand level. The side board is a vertical projection of a walk, install partitions at right angles to the side board. The side board is the procedure is to lay concrete in either partition thus formed, allow to set, and then remove the board and pour the remaining slabs.

For terraces, end boards must be placed on the ends of the boards with their upper edge making the top edge of the side board.

OTTAWA.—The Agriculture Department forecast that the long-named sunflower plant may soon provide Canada's food processing industry with its entire supply of pec-

pectin is a chemical substance which has exceptional gelling properties. It is used in the preparation of jams and jellies, certain types of candy, bakery products, thickening agents in various food products, certain pharmaceuticals, penicillin emulsions and blood plasma substitutes. Research work on the extraction of pectin from the sunflower plant

partment predicted that when the work is completed, a flourishing new industry will make its appearance in Canada and that the nation will probably become the leading producer of sunflower plants in the western world.

The sunflower plants may provide food processing industry with its resins. "Pectin is the most important resin," the department says. "Pectin is found in the waste seed meals of sunflower plants. Each seed contains about 16 per cent pectin. The main problem with sunflower resin, according to the department, is that it develops its maximum strength under high acid conditions that those encountered in

sure you don't overdo it. You should avoid exhaustion. It is
 a good idea to wear an athletic cap and a sweater or jacket to stop
 the sun or driving before you get too hot or too cold. You should
 feel tired. If you are a woman, you should enjoy an active life, make
 an effort to concentrate on meditation.

Certainly such energetic exercises as horseback riding and dancing
 should not be included in your diet. Unnecessary risks at this point
 are hazardous. Remember, you mustn't overdo your housework
 either. Allow periods throughout the day for rest and outdoor
 work. It is most important that you get enough fresh air and sun-
